**Air-Cleaning of
Tobacco-Smoke**

Situation:

Protection of non-smokers against tobacco-smell has high priority all over the world. There are laws passed by court that persons have to be protected against smoking on balconies, terraces and living-rooms.

At the same time every smoker takes care to protect the environment.

The rules become stricter for air-cleaning reasons.

Problems:

The relationship between smokers and non-smokers creates often conflicts within the family, at work, at public events, in restaurants and in the neighbourhood.

I.e. the main question is: How is it possible that smokers will be no longer discriminated while non-smokers will be protected against tobacco-smell at the same time?

ACS 300 Air-Cleaner

CLIVENT has the solution with a new patented product-development:

CLIVENT-Smoking-Chair CSC 300-I-1 – Indoor for 1 person

This luxury piece of furniture is a unique and has an exclusive design. The smoking-chair is a highlight for living-rooms, offices, meeting-rooms and for lounges. The air-cleaning-process is very silent which is a big advantage for the environment.

Individual colours and designs on request.

CLIVENT-Smoking-Chair combines the interests of smokers and non-smokers at the same time to protect the environment.

Applications:

Living-rooms, conservatories, balconies, terraces, hotel-lobbies, public buildings, waiting-rooms, lounges, hotels, pubs, airports, exhibition-halls, meeting-rooms, senior-residences, railway-stations, discotheques, bars etc.

Description of the System:

Comfortable, convenient chair with integrated air-cleaning-system ACS 300 against tobacco-smell.

Due to the special filter system and the 45° angle construction of the housing, tobacco-smell will be absorbed. The remaining tobacco-smell will be neutralized. The cleaned air will be distributed inside the room by a tangential fan and the air-outlets.

Technical Specifications:

Type CSC 300

Air-Volume: max. 300 m³/h
Speed 2: 200 m³/h
Electric power consumption: 51 W
Voltage: 230 V ~ 50 Hz

CSC 300-I-1 – 1 person / Dimensions:

Width: 700 mm
Depth: 670 mm,
Height: 1775 mm

CSC 300-I-2 - 2 persons / Dimensions:

Width: 1200 mm
Depth: 670 mm
Height: 1775 mm

Situation:

Protection of non-smokers against tobacco-smell has high priority all over the world. There are laws passed by court that persons have to be protected against smoking on balconies, terraces and living-rooms.

At the same time every smoker takes care to protect the environment.

The rules become stricter for air-cleaning.

Problems:

I.e. the main question is: How is it possible that smokers will be no longer discriminated while non-smokers will be protected against tobacco-smell at the same time?

CLIVENT has the solution with a new patented product-development:

CLIVENT-Smoking-Table ST 120

With this new development non-smokers enjoy full protection against tobacco-smoke. The air-cleaning process is very silent which is a big advantage for the environment.

Individual colours and designs on request.

CLIVENT-Smoking-Table combines the interest of smokers and non-smokers at the same time for protection the environment.

Applications:

Living-rooms, conservatories, balconies, terraces, hotel-lobbies, public buildings, waiting rooms, lounges, hotels, pubs, airports, exhibition-halls, meeting-rooms, senior-residences, railway-stations, discotheques, bars etc.

Description of the System:

The smoking-table with integrated air-cleaner is made of a light material, equipped with three grounds for convenient and comfortable enjoy of tobacco. Mobile execution with 4 wheels. Very compact and space-saving design. The height of the smoking-table is adjusted to the standard dimension of chairs and couches. In the middle of the smoking-table there is a special ashtray for easy cleaning. The air-cleaner can be removed out of the smoking-table in order to use it as a separate unit for different applications.

Due to the special filter system and the 45° angle construction of the housing, tobacco-smell will be absorbed. The remaining tobacco-smell will be neutralized. The cleaned air will be distributed inside the room by a tangential fan and the air-outlets.

Individual colours and designs on request.

Depth: 370 mm
Height: 1300 mm

ACS 300 Air-Cleaner

Energy Saving Domestic Fans
 Exclusive design window-fans, sensor-control for humidity, air quality and movement sensor

Heat-Recovery-Units
 for intake air and extraction of air

New: Air-Conditioner without outdoor-unit

Mobile Air-Conditioner

Inverter-Technique

Energy saving, mono and multi-split air conditioners

Chillers Cold Water Air Conditioners
 with a big range of performances.
Heat Pumps

Fan Coils, floor-standing,

Ceiling Mounting, Wall mounting
 Build into ceilings, cabinets

Industrial Cooling Process Cooling
 e.g. cooling of tools in production process.
 Series: Heavy-Tec

High Performances
 13 – 1500 KW with many special solutions according the customer's demand

Industrial cooling Process Cooling
 Series Eco-Dry-Tec
 The perfect free-cooling System for saving energy

Aqua-Tec
 Complete Pump-System for easy installation and energy saving and reduction of working costs

Dehumidifiers for domestic and commercial, industrial use.
Dehumidifiers for swimming-halls.

Humidifiers for domestic and commercial/industrial application.

Electric Fan Heaters
 for industry, building places, agry culture and domestic use.

Many Special Solutions e.g. temperature limitations to 60° C with sensor

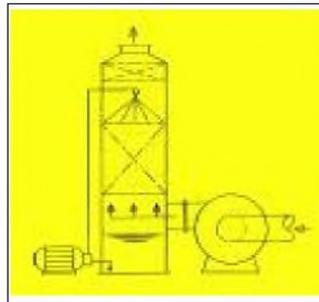

Air Curtains
 Heaters with warm water technique

Air-Cleaner New: Mobile Cookerhoods

Air-Cleaner for tobacco-smells, Smoking-Chairs, Smoking-Tables

Industrial Air-Cleaner with special solutions

Air-Cleaning-System
 with full heat recovery for industry, workshops, gastronomy

Ecologic Wet-Filter-System

Incineration-Plants
 Waste will be burned for production of electricity and heat. Waste to energy
 New: Mobile Incineration plants

Built into containers e.g. for medical waste.

Drinking-Water-Quality Production-Units
 Complete pre-mounted in container, ready for use in all sizes.
